We have entered the marks that you sent us and the system can generate the marks accordingly, Generating report is done at the Ems Reports Module Exam Result Reports.

Attached also is a sample Pdf report.

The screenshot shows the 'Ems Reports' module interface. On the left is a sidebar with navigation options: Dashboard, Schools, Students, Teachers & Classes, Geo - Location, Examinations, Ems Reports (selected), Exam Result Reports, Settings, and Import Excel Records. The main area displays the 'Ems Reports' section with a 'Primary School' dropdown and a 'Generate Report' button. A sample PDF report is shown, titled 'Education Management System Kamuchege Primary School'. The report includes the following details:

2017-03-15 04:22:50

More varieties of reports can be selected using the Exam type drop down.

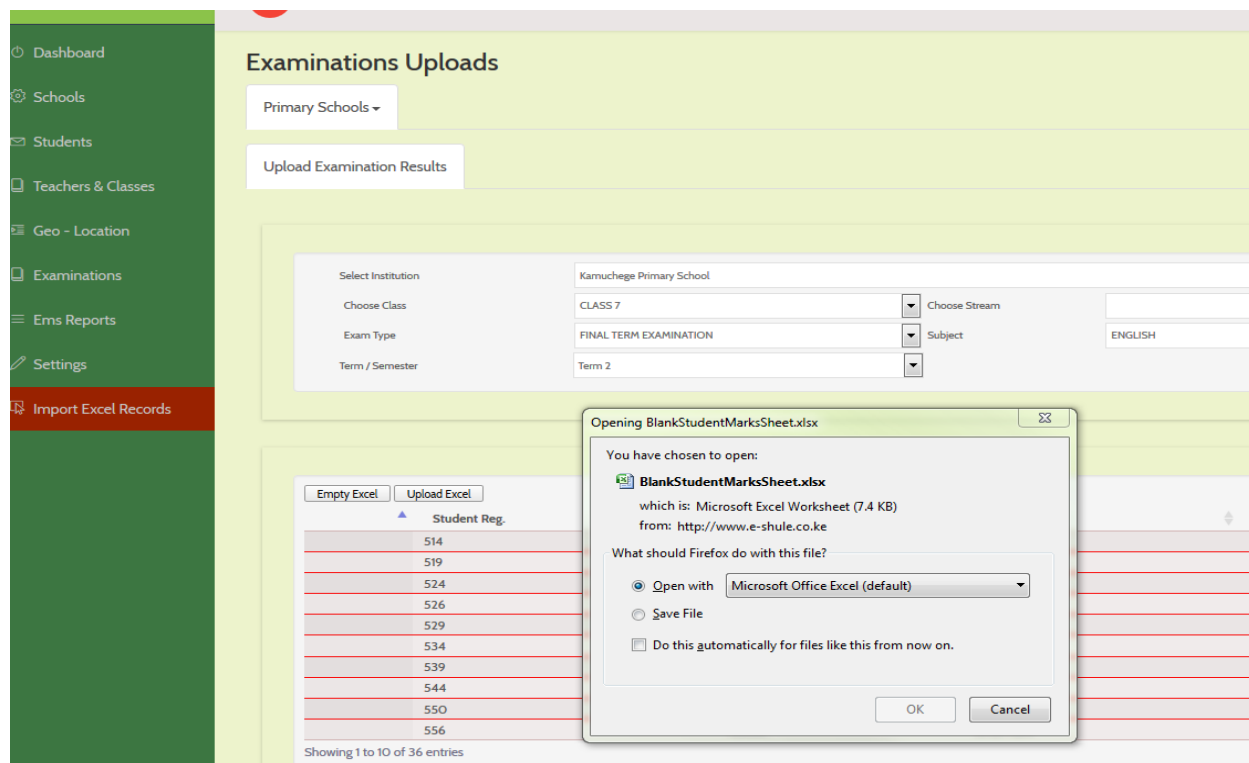

NB:

We formatted the excels sent enable the system import them.

To enter new data, let the system produce the student excel template with all the students name since this makes it easier.

We also added students that did not exist in the system.

Use the Empty excel to generate a system compatible exam fill sheet.

A sample excel generated by the system is as shown below:

Note the system generated student id:
